

CrossCad / Plg Cad conversion engine

Export your Rhino models as 3D PDF

Datakit solution

Datakit provides a **fully integrated plug-in for Rhinoceros**. It allows you to save your models in **3DPDF** format. It is available for Rhino 5 to 7

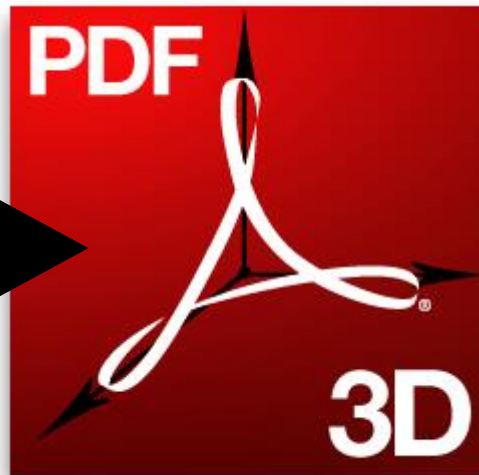

Rhinoceros
NURBS modeling for Windows

Interest of 3DPDF export

3DPDF is a format enabling to **visualize and share models** very easily by anybody.

3DPDF files can be read with **Adobe Reader**.

As this software is installed on almost all workstations, you will be able to **share your models** very easily without asking the recipients to install a CAD software or a viewer.

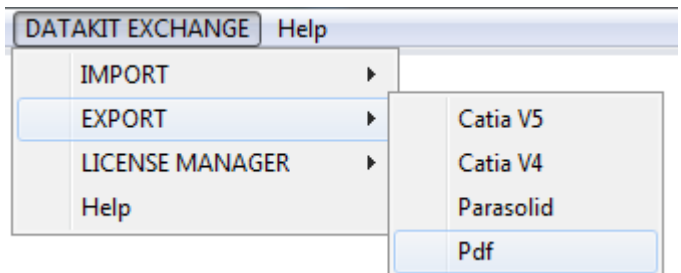

Why choose Datakit plug-in ?

- **Easy** to install
- **Fast** processing
- **Frequent updates**
- Customer **support**
- Handled data :
 - Model **tree**
 - **Brep** and **Mesh**
 - Linear and angular **dimensions**
 - **Texts**
 - **Attributes** (colors, visibility, layer...)

Intuitive use

This plug-in is very **easy to use** : once installed, a « DATAKIT EXCHANGE » menu is added to Rhino. Then you just have to open your model into Rhino and to click on « Export → PDF » in this menu.

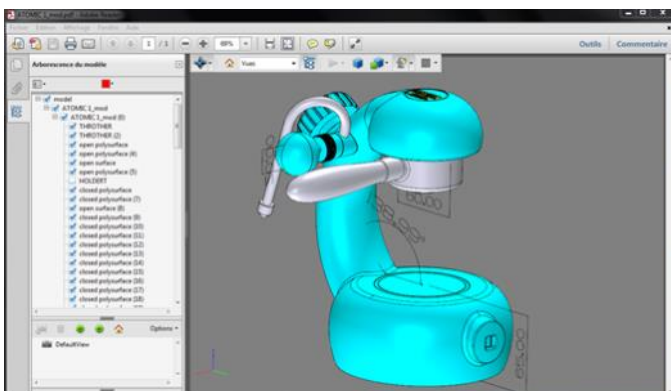

A complete range

Datakit also provide other interfaces for Rhino :
Imports: ACIS - CATIA V4, V5 & V6 - CGR - Creo View - IFC - Inventor - JT - Parasolid - PLMXML - ProE / Creo - Revit - Solid Edge - UG NX
Exports: CATIA V4 & V5 - CGR - FBX - glTF - JT - Parasolid - PDF 3D - SOLIDWORKS - UG NX

Plug-ins for SolidWorks are also available.

And for any other conversion, choose **CrossManager** : a stand-alone software supporting almost **50 different CAD formats**.
