

CrossCad / Plg Cad conversion engine

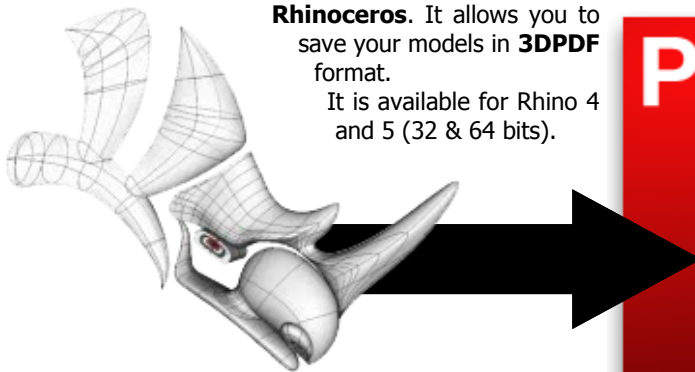

Export your Rhino models as 3DPDF

Datakit solution

Datakit provides a **fully integrated plug-in for Rhinoceros**. It allows you to save your models in **3DPDF** format.

It is available for Rhino 4 and 5 (32 & 64 bits).

Interest of 3DPDF export

3DPDF is a format enabling to **visualize and share models** very easily by anybody.

3DPDF files can be read with **Adobe Reader**.

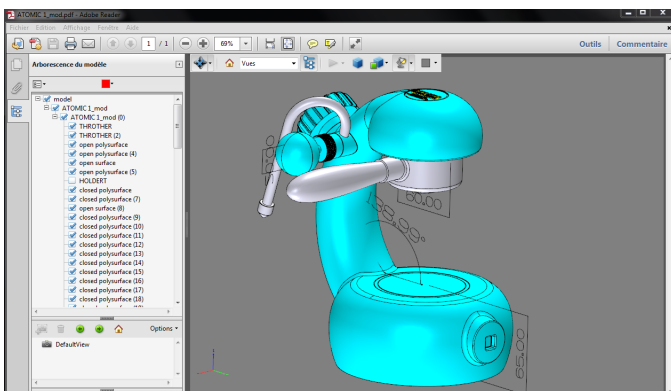

As this software is installed on almost all workstations, you will be able to **share your models** very easily without asking the recipients to install a CAD software or a viewer.

Rhinoceros[®]
NURBS modeling for Windows

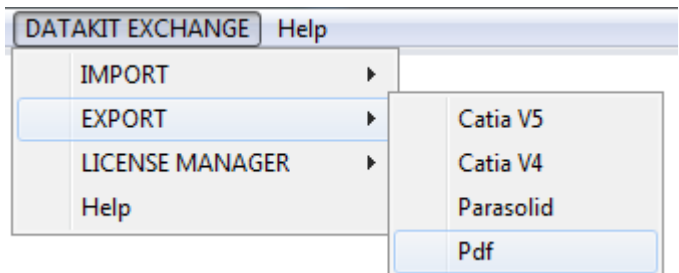

Why choose Datakit plug-in ?

- **Easy** to install
- **Fast** processing
- **Frequent updates**
- Customer **support**
- Handled data :
 - Model **tree**
 - **Brep** and **Mesh**
 - Linear and angular **dimensions**
 - **Texts**
 - **Attributes** (colors, visibility, layer...)

Intuitive use

This plug-in is very **easy to use** : once installed, a « DATAKIT EXCHANGE » menu is added to Rhino. Then you just have to open your model into Rhino and to click on « Export —> PDF » in this menu.

A complete range

Datakit also provide other interfaces for Rhino :

Imports : ACIS - CATIA V4, V5 & V6 - CGR - Inventor - JT - Parasolid - PLMXML - ProE / Creo - Solid Edge - UG NX

Exports : CATIA V4 & V5 - CGR - JT - Parasolid - 3DPDF

Plug-ins for **SolidWorks**, **ThinkDesign**, **Open CASCADE** and **3ds Max** are also available.

And for any other conversion, choose **CrossManager** : a stand-alone software supporting **40 different CAD formats**.
