

CrossXpert

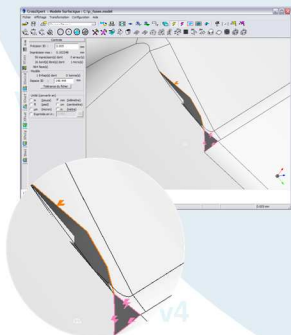

RECOVER, ANALYZE, HEAL, EXPORT YOUR CAD MODELS
Exchange your CAD data while keeping your original model geometry unchanged, undistorted and with no loss of information .

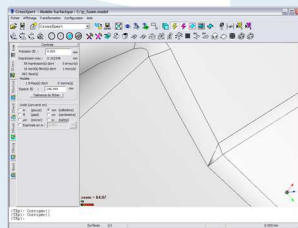

Original model in
Catia V5

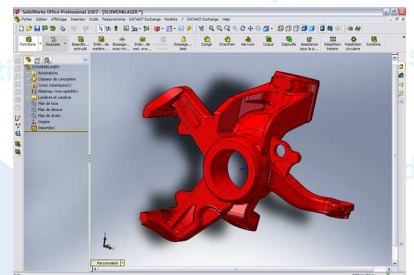

Geometric flaws detected
by CrossXpert

area to repair

Surface repaired by CrossXpert

VALID solid after
conversion in SolidWorks

Analyze, repair, simplify your most complex models

- CrossXpert solves all incompatibility problems, geometric or topologic, that occur during 3D models transfer.
- CrossXpert adapts the model tolerance to the level of precision used by the target modeller and makes the necessary repairs, producing a solid that is VALID in the target applications .
- The integrity of the original model is completely intact. The assemblies and the attributes (names, colors, layers) are preserved and the analytical surfaces are reproduced to meet the design intent.
- The geometry cannot be deformed in automatic mode .

Exploit your models directly

- One product to translate all formats of the market (native or neutral)
- A universal solution independent from systems of origin and destination .
- CrossXpert simplifies and significantly reduces parts and assemblies .
- The user can delete according to his needs: fillets, holes, bumps... to make the data processing more efficient in finite element meshing applications or facilitate viewing of large assemblies.

A solution to your needs

Consult our team of specialists to get the tool and the method that will do the best job for your files.

We offer you a choice of approach: you can either buy whatever software licences you need, or let us take care of converting your files either individually, as and when you need, or as a complete migration of your CAD databases.

NEUTRAL AND NATIVE FORMATS (CATIA V4, CATIA V5, CADD, INVENTOR, PRO-E, SOLIDWORKS, UGNX...) IN READING/WRITING.

How to contact us

To buy CrossXpert, or to get a free trial license, call us or visit our website.

Web: http://www.datakit.com/en/crosscad_pro.php

Datakit is a privately-owned company specialised in CAD Data Exchanges and services founded in 1994 by Francis Cadin. Its very core target is even more the software companies, however, the translators are sold in different countries by a growing network of resellers or on line. Its clearly identified strategy lies on 3 major axis: international focus, close relationships with software editors, multiple fields of targeting.
