

CrossManager Advanced end-user

As an aircraft manufacturer, manufacturer, manufacturing services provider and logistician, Daher has been committed to innovation since its creation 160 years ago

**Easy batch processing of CAD files with Datakit**

Daher is an industrial group, aircraft manufacturer, industrial service provider and logistician operating worldwide. At Tarbes, France, the aeronautical design office regularly receives 3D wireframe files they read and converted to Catia V5 with CrossManager, the Datakit's technical data exchange solution.

Jordan CARON, CAD domain manager, explains: "This solution allows us to automatically and quickly convert the numerous files we receive with all the drawings and the wireframe geometric representation of the parts to manufacture ».
