CAD Converters dedicated to Rhino

15 CAD formats imports and **10 exports** are available. These plug-ins allow Rhino to read formats not natively supported by the software or to save models into formats not available in Rhino. They are compatible with **Rhino 5 to 7**.

Intuitive use

The use of the plug-ins is **very easy**: once installed, a "DATAKIT EXCHANGE" menu is added to Rhino. From this menu, you can, **from a single click**, perform any models import or export operations, in the formats you want.

Imports and exports bundles

Datakit offers its plug-ins individually, or as "bundles": **Cut-price packages of several interfaces.**

4 Rhino plug-ins bundles are available:

- An **import bundle**, including 13 formats: ACIS, CATIA V4, V5, V6, CGR, Creo View, Inventor, JT, Parasolid, PLMXML, ProE / Creo Parametric, Solid Edge & UG NX.
- An **export bundle**, including 7 formats: CATIA V4, CATIA V5, CGR, FBX, gITF, JT and Parasolid.
- An **"import + export" bundle** gathering the two others.
- A **"BIM"** bundle including IFC and Revit import.

Why choose Datakit plug-ins?

- **Easy** to install
- **Fast** data processing
- Regular **updates**
- **Responsive** customer support
- **"Batch"** processing available
- Supported data (depending on the format):
 - ◆ Model **tree**
 - ◆ **Parts & assemblies**
 - ◆ **Geometry, wireframe, mesh, topology, Brep**
 - ◆ Linear and angular **dimensions**
 - ◆ **PMI, FD&T, GD&T**
 - ◆ **Texts**
 - ◆ **Attributes** (color, visibility, layers...)

A large distribution network

Datakit works with many **Rhino** resellers who provide its CAD data exchange solutions **worldwide**.

Building on its experience in export, Datakit wants to further consolidate its distribution network. If you are a reseller, we invite you to join us! sales@datakit.com

Datakit also regularly attends the meetings organized by McNeel.
