

About Datakit

Datakit was founded in 1994 to develop and promote CAD data exchange solutions, standalone or plug-ins for end-users as well as software development kits for software companies.

It has grown as a world-leading supplier of CAD data technologies used by software vendors as well as industrial companies.

Datakit offers the most comprehensive support of 2D and 3 formats including exceptional PMI supports (both graphical and semantic). Datakit also offers custom development and integration services on a case-by-case basis for additional fees.

Datakit figures

- 29 employees, 22 engineers in research & development.
- More than 100 Active Software Vendors partners.
- 80% of turnover abroad integrating our technology.

Offices and resellers

- Datakit has offices in France, located in Lyon, Marseille and Flouere.
- The company is established worldwide through a network of efficient resellers
